

## Primary Curriculum

Our Primary School students are provided with a wealth of learning opportunities from our broad and balanced curriculum ensuring that they are equipped with the skills and knowledge to tackle the problems of tomorrow as future Global Citizens.

Our Primary School students in Year 1 to Year 6, follow the National Curriculum for England, with a strong focus on the core subjects – English, Mathematics and Science and Computing, carefully designed to meet the needs of our diverse international community as well as the Ministry of Education.

Additionally, we make significant links with the UAE and the rest of the world across the remaining foundation subjects, where our students have opportunity to develop their knowledge, understanding and skills which they can then apply in all areas of the curriculum using innovative technologies to enhance their learning experiences.

Our cross curriculum links are embedded in the amazing opportunities we offer our students through the foundation subjects; History, Geography, Art and Design, Design and Technology, Performing Arts, Physical Education, Swimming, Morale Education supplemented with our PSHE and Citizenship programme. In Computing, students use digital technologies as a vehicle for learning across the curriculum. Our students have access to a dedicated computer suite where they can develop their skills as programmers using coding software. Our innovation room enables students to explore a wealth of digital robotic devices that they can code and use to solve real life problems.

Our skillfully crafted curriculum engages our international community of students, meeting their diverse needs and providing them with both contextual, UK and wider world experiences as they grow and develop as values based leaders of tomorrow – ensuring we help them to reach their dreams.

We have a strong student leadership team that has significant impact on the direction and targets for the Leadership Team. Their collective Student voice has an impact on learning environments, resources and opportunities ensure that as a community of learners we are dedicated to ensure we grow from strength to strength and improve.

We aim to develop our students not just academically, but as confident individuals who want to make a difference in the world in which we live. Our school values, positive ethos and dynamic and innovative teaching approaches encourage our students to develop their creativity and critical thinking skills through enquire based learning opportunities.

Our students – Lead, Learn and Inspire

Lead. Learn. Inspire.
